Lodge, McCall, ID. .

SIMA MEMBERSHIP DUE: Are due now. Both SIMA and
NAMA Membership Forms on the last page of this newsletter.

What's Fruiting Now:

The following mushrooms were brought into the October
and November meetings for identification: *Coprinus comatus*,,
(not pictured), *Pholiota destruens*, *Agaricus xanthodermus*,
Hericeum americanum, *Macrolepiota rachodes*, *Flammulina
velutipes*, *Pleurotus pulmonarius*, *Hebeloma crustuliniforme* ,
(not pictured), *Pisolithus tinctorum*, *Suillus sp.*, *Agaricus sp.*
Lycoperdon sp. *Hohenbuehelia petaloides*, *Tricholoma
flavovirens*

identification skills. Once again we had good weather on
Friday and Saturday for collecting. The weather turned
Saturday night. We had to bring the mushrooms displayed on
the deck inside.

This is what foray members brought in Thursday afternoon
before supper. We were so pleased to see members walk in
with baskets full of collections.

This is what our table of specimens to be identified looked
like before we when we sat down to eat dinner Thursday
night. Several members forayed on the way to the foray. We
were expecting to have low numbers of specimens due to the
weather.

Photos by Cathy Ford.

Fall Foray Highlights

The foraying was good despite the dry summer and fall..
We found lots of different species by hunting moist locations
Many of our usual hunting areas were too dry. We collected
plenty of mushrooms to keep SIMA members busy practicing

Once again Elinor Chehey cooked breakfasts and dinners
for the foray participants staying at Lakeside Lodge. And as
usual we ate very well. Several people took over the kitchen
Saturday afternoon to share their bounty of good edibles
stashed in their baskets while identification was going on.

Foray-goers were back at Lakeside after lunch to get serious about learning how to identify mushrooms.

The weather turned bad Saturday night and we had to bring the tables of identified specimens inside from the deck overlooking the lake so they would not get rained on or blow away. Notice the orange tags.

We put orange identification tags on specimens we have never collected before. These mushrooms are identified by several different people individually and confirmed by microscopy. Unless we can absolutely confirm that the mushroom's identification is accurate, we don't count it as a new species for our master list. .

By the time we quit identifying Saturday night, we had identified 88 species. As always there were mushrooms we did not have the time and resources to identify

SIMA's Mushroom Blog Check what is posted!

The blog is still functioning: Check it out! The hot weather and lack of mushrooms this summer and fall has slowed down usage. Enter <http://idahomushrooms.blogspot.com> in your browser,. Anyone can look at what is posted. If you have pictures and comments you wish to post contact Kevin through e-mail Kevinsub@hotmail.com or phone him for the

password. He is listed in the SIMA directory. If you already have a gmail account Kevin can add you that way also. Once Kevin adds you and you have the password, Log in and check on Dashboard to make an entry. Also, when you e-mail Kevin, if you give him a phone number, he can call you and then add you. This may be the easiest way. **There are some great mushrooms finds and information about where and when to look.**

Foray Shirts: Kevin Sublett designed a foray shirt for SIMA. There are limited shirts still available in limited sizes.. The cost is \$18 for the collared shirts. E-mail Kevin at [Kevin Sublett \[kevinsub1@gmail.com\]](mailto:KevinSublett@kevinsub1@gmail.com) if you are interested and there are shirts left in your size. There are no T-Shirts left. Currently all that are left are the **Collared short Sleeve Shirts:** 1 Med, 5 L, , 2 XXL
